

## Why Gro Power<sup>®</sup>

## Other Organic Products

- No animal, human waste  Animal waste
- True humus (concentrated)  Organic fibre  
40-to-1 over organic fibre
- Only organic material in humus form  Not broken down; can take up to  
can do all the agronomic functions two years to break down
- High quality humic acids  No organic sources listed or  
guaranteed
- Active soil conditioners  No soil conditioners in many cases
- 100% homogeneous  Not homogenous; has some blended  
nutrients
- Only beneficial bacteria  Sterile if composted as listed  
on bags of some products
- Non-staining iron, manganese and zinc  Can stain
- Uniform greens and fairway grades  Non-uniform with large pieces
- No nutrients from animal sources -  Contains feathermeal and turkey litter.  
therefore more consistency in terms of breakdown and release into soil Feathermeal can create hydro-probic  
conditions on turf
- Immediate breakdown of granulars  Slow breakdown of particles. Mower  
(particles) pickup
- Odourless  Has odour
- Consistent and predictable response  Unpredictable because has too many  
from application release factors for organic nutrients
- Will never layer or stratify  Can layer or stratify because of  
type of organic material
- 38 years in the industry  ??? years in the industry
