CirrusPRO™ Central Control

The Ultimate Evolution in Irrigation Control

CIRRUSPRO™

"I can be in the office working while CirrusPRO™ is fully operational in the background. Whether I'm on my phone, a tablet, or the PC, there is access to the full central control software giving instant control and reliability."

CirrusPRO™

Go completely mobile with CirrusPRO and get full central control from a mobile device anytime, anywhere, any place. With CirrusPRO you can make any irrigation changes directly from the map and watch your updates happen in real time. No matter what the day brings, you'll be ready with CirrusPRO.

Learn more

FEATURES & BENEFITS

Engineered to help you save time and money, CirrusPRO offers a state-of-the-art golf irrigation control system with an intuitive user interface (UI) and precise water management features.

- **Irrigation That Goes Where You Go:** As the only mobile-first irrigation control system on the market, you get a high level of performance from anywhere, on any device.
- **More Freedom:** Add unlimited users, choose from multiple languages and adjust settings for multiple stations all at once.
- **Better Data:** Irrigate precisely with real-time data that monitors and notifies about course conditions.
- **Complete Control:** Water through patented Rotation, Application, ET and Runtime.

SOFTWARE HIGHLIGHTS

- Custom course, hole and station names
- Programming in seconds, minutes and hours
- Runtime control through System Level Water Budget, Programme Adjust, Schedule Adjust, Schedule Level Temporary Adjust, Programme Level Temporary Adjust, Station Level Temporary Adjust as well as Station Adjust
- Detailed reports including: Station Runtime, Alarms and Warnings, Monthly Report Card, Monthly Flow, Flow Log Graph, Water Management, Yearly Water Consumption and Rainfall
- Weather data communication
- Automated email and texts for alarms
- Automatic weather-based adjustment from a wide range of weather source options
- User-selectable languages
- Configurable settings by user
- Make irrigation adjustments directly from the map
- Compatible with Rain Bird Golf Irrigation Systems

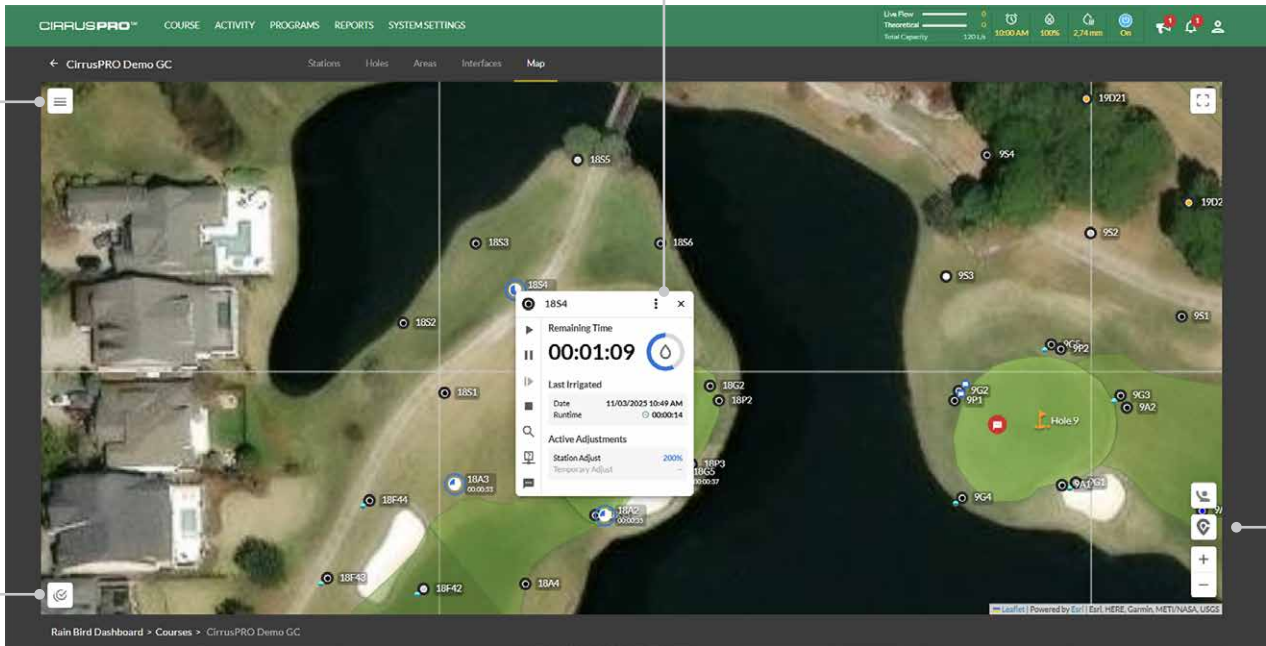

CUSTOM MAP LAYER ICONS

Check high-level information without selecting a station.

-  Identify stations with irrigation adjustments
-  View stations programmed for Cycle+Soak™
-  See remaining station time

STATION WINDOW

Map access offers important station information quickly and easily. Select any rotor on your map to access the station window. Then execute irrigation actions like starting, stopping, pausing and resuming a station. Users will see the time remaining, last time a station was irrigated, any active station adjustments, run and view diagnostics.

MULTI-STATION SELECTION

Complete tasks faster in fewer clicks. Select multiple stations while on the course to perform irrigation actions with ease.

FIND ME

Pinpoint current location to irrigate nearby areas with ease.

TROUBLESHOOT DIRECTLY FROM THE MAP

Eliminate the need for separate applications like MI or Freedom and quickly run irrigation or diagnostics in real time directly from the map.

IRRIGATE WITH PRECISE CONTROL

Patented watering by rotations gives you control of irrigation with unparalleled precision.

CUSTOM DASHBOARDS

Customise your dashboard with drag-and-drop functionality to display the data that matters to you.

OPTIMISE YOUR IRRIGATION WITH DRYRUN™

Quickly preview the efficiency of your irrigation schedule allowing for adjustments prior to irrigation events to shorten water windows, optimise pump efficiency and save electricity.

Rain Can

A rain can working in tandem with our patented Rain Bird® Rain Watch™ technology responds in real time to rain events; reducing wear and tear and creating a more efficient, intelligent system.

Weather Station

Enhance your turf's quality with Spectrum's WatchDog* weather station. By harnessing real-time evapotranspiration (ET) data, you can precisely irrigate using CirrusPRO for optimal results.

Hybrid Control

With Hybrid Control, CirrusPRO lets you control multiple types of field control; IC Systems, Satellite Systems, Decoder Systems, or a combination of systems. Hybrid Control means total control — and CirrusPRO puts that control right in your hands.

IC System™

Save on water and labour costs and ensure your course is always looking its best. Two-way integrated control technology is built into every IC Module on every rotor and valve which is constantly monitoring every station and providing real-time updates.

Decoder

Ideal for block irrigation systems, user can choose between single-head control or block-station control. Expansion is as easy as splicing into the two-wire path to add additional decoders.

PAR+ES Satellites

Get live communication from the central via a two-wire path or LINK radio communication with no need to wait for syncing or downloads. With IFX technology, PAR+ES satellites allow you to easily add the IC System precision and control without a complete overhaul.

CirrusPRO in Their Words

"What's so great is the real-time interface and the control it brings - it's extremely easy to use and the new system is dependable, giving us everything Rain Bird promised it could."

— **Jonathan Bradshaw, Golf Course Superintendent**
Druids Glen Hotel & Golf Resort | County Wicklow

"CirrusPRO is new and so easy to use – it's unbelievable, especially as you can access it from anywhere. The difference now is that our irrigation window is only three hours, instead of eleven, we're applying water exactly where we want it to be and the system measures times, application rates and the exact quantity of water being used."

— **Steve Mackie, Course Manager**
Wellingborough Golf Club | Wellingborough, England

"The best aspect is being able to log-in from anywhere in the world. I know that any one of my staff can do the same and that really takes the pressure off. You literally have everything you need in your hand. That's total peace of mind."

— **Andy Ewence, Course Manager**
Woking Golf Club | Woking, England

"CirrusPRO allows me to adjust our irrigation so precisely that I get optimal playing surface quality."

— **Christian Mueller, Course Manager**
Hof Hausen vor der Sonne | Hofheim, Germany

"CirrusPRO is a huge step forward. The mobile version is amazing as there's so much information available to you. You have the mapping on a mobile device following you around the course. The amount of information you can access is quite phenomenal; it's very powerful. You can troubleshoot and update the system by being in the field. It's so much easier and simpler."

— **Barry Neville, Course Manager**
Stanmore Golf Club | Stanmore, England
